- 默认有 `18$` 的免费额度，根据训练模型的不同收费不同，我们选择最贵的收费模型 `Davinci`；

Language models

Base models

Ada Fastest	Babbage	Curie	Davinci Most powerful
\$0.0004 /1K tokens	\$0.0005 /1K tokens	\$0.0020 /1K tokens	\$0.0200 /1K tokens

Multiple models, each with different capabilities and price points. **Ada** is the fastest model, while **Davinci** is the most powerful.

Prices are per 1,000 tokens. You can think of tokens as pieces of words, where 1,000 tokens is about 750 words. This paragraph is 35 tokens.

Making requests

You can paste the command below into your terminal to run your first API request. Make sure to replace `YOUR_API_KEY` with your secret API key.

```
1 curl https://api.openai.com/v1/completions \
2 -H "Content-Type: application/json" \
3 -H "Authorization: Bearer YOUR_API_KEY" \
4 -d '{"model": "text-davinci-003", "prompt": "Say this is a test", "temperature": 0.5}'
```

This request queries the Davinci model to complete the text starting with a prompt of "Say this is a test". The `max_tokens` parameter sets an upper bound on how many **tokens** the API will return. You should get a response back that resembles the following:

```
1 {
2   "id": "cmpl-GERzeJQ4lvqPk8SkZu4XMIuR",
3   "object": "text_completion",
4   "created": 1586839808,
5   "model": "text-davinci-003",
6   "choices": [
7     {
8       "text": "\n\nThis is indeed a test",
9       "index": 0,
10      "logprobs": null,
11      "finish_reason": "length"
12    }
13  ],
14  "usage": {
15    "prompt_tokens": 5,
16    "completion_tokens": 7,
17    "total_tokens": 12
18  }
19 }
```
